## How it all began...

If he hadn't stopped by a friend's transmission shop nearly 33 years ago, this story might be about a paint & body shop. Dennis has worked on cars since he was 15 years old. He's done it all...from engine rebuilding, paint & body and eventually to transmission repair. He was also a licensed plumber for many years and even dabbled in photography in his younger days. But, it was his love for automobiles that kept driving him back to the automotive industry.
